

CAUSES OF CALF SCOURS BASED ON SIGNS AND TIME-FRAME OF SYMPTOMS

Provided by First Defense.

SIGNS

- E.coli** Diarrhea, depression, coma
- Rotavirus** Watery brown to light green diarrhea with blood mucus
- Coronavirus** Profuse, watery, and yellow diarrhea
- Clostridium** None in most cases; may include strain, kicking at abdomen, foul smelling diarrhea containing blood
- Cryptosporidium** Watery brown to light green diarrhea with blood mucus
- Coccidia** Tarry and often bloody scours
- Salmonella** Diarrhea with blood and fibrin, depression, and fever
- Nutritional** Milk or milk replacer fed at inconsistent temperature or improper solid concentrations
- BVDV** Ulcers on the tongue, lips, and mouth. Very liquid feces that are yellowish brown to grayish green and may become yellowish gray containing blood and fibrin as the disease progresses

Consult your veterinarian and send samples to a diagnostic lab for pathogen confirmation.
